

Lot and irrigation reference map

181 residential lot records + 4 contextual tract records | 19 lots linked to inventory | Geographic parcel snapshot October 9, 2026

■ Timer 1 ■ Timer 2 ■ Timer 3 ■ Battery ■ Lot with no confirmed link ■ Contextual tract

Colors show documented inventory associations. They do not show hydraulic boundaries, valve locations or physical timer positions.
Dashed frames correspond to detail tiles 1-4. Battery entries are separate from central timers. Gray lots have no confirmed link; this does not mean no irrigation.

Detail tile 1 Northwest

Parcel labels: lot number / #house number | Colors follow the overview legend | North up

Use the lot index for full street names and timer-zone references. Adjacent detail tiles overlap at the edges.

No range coverage, valve position, timer position, live schedule or isolation instruction is inferred.

Detail tile 2 Northeast

Parcel labels: lot number / #house number | Colors follow the overview legend | North up

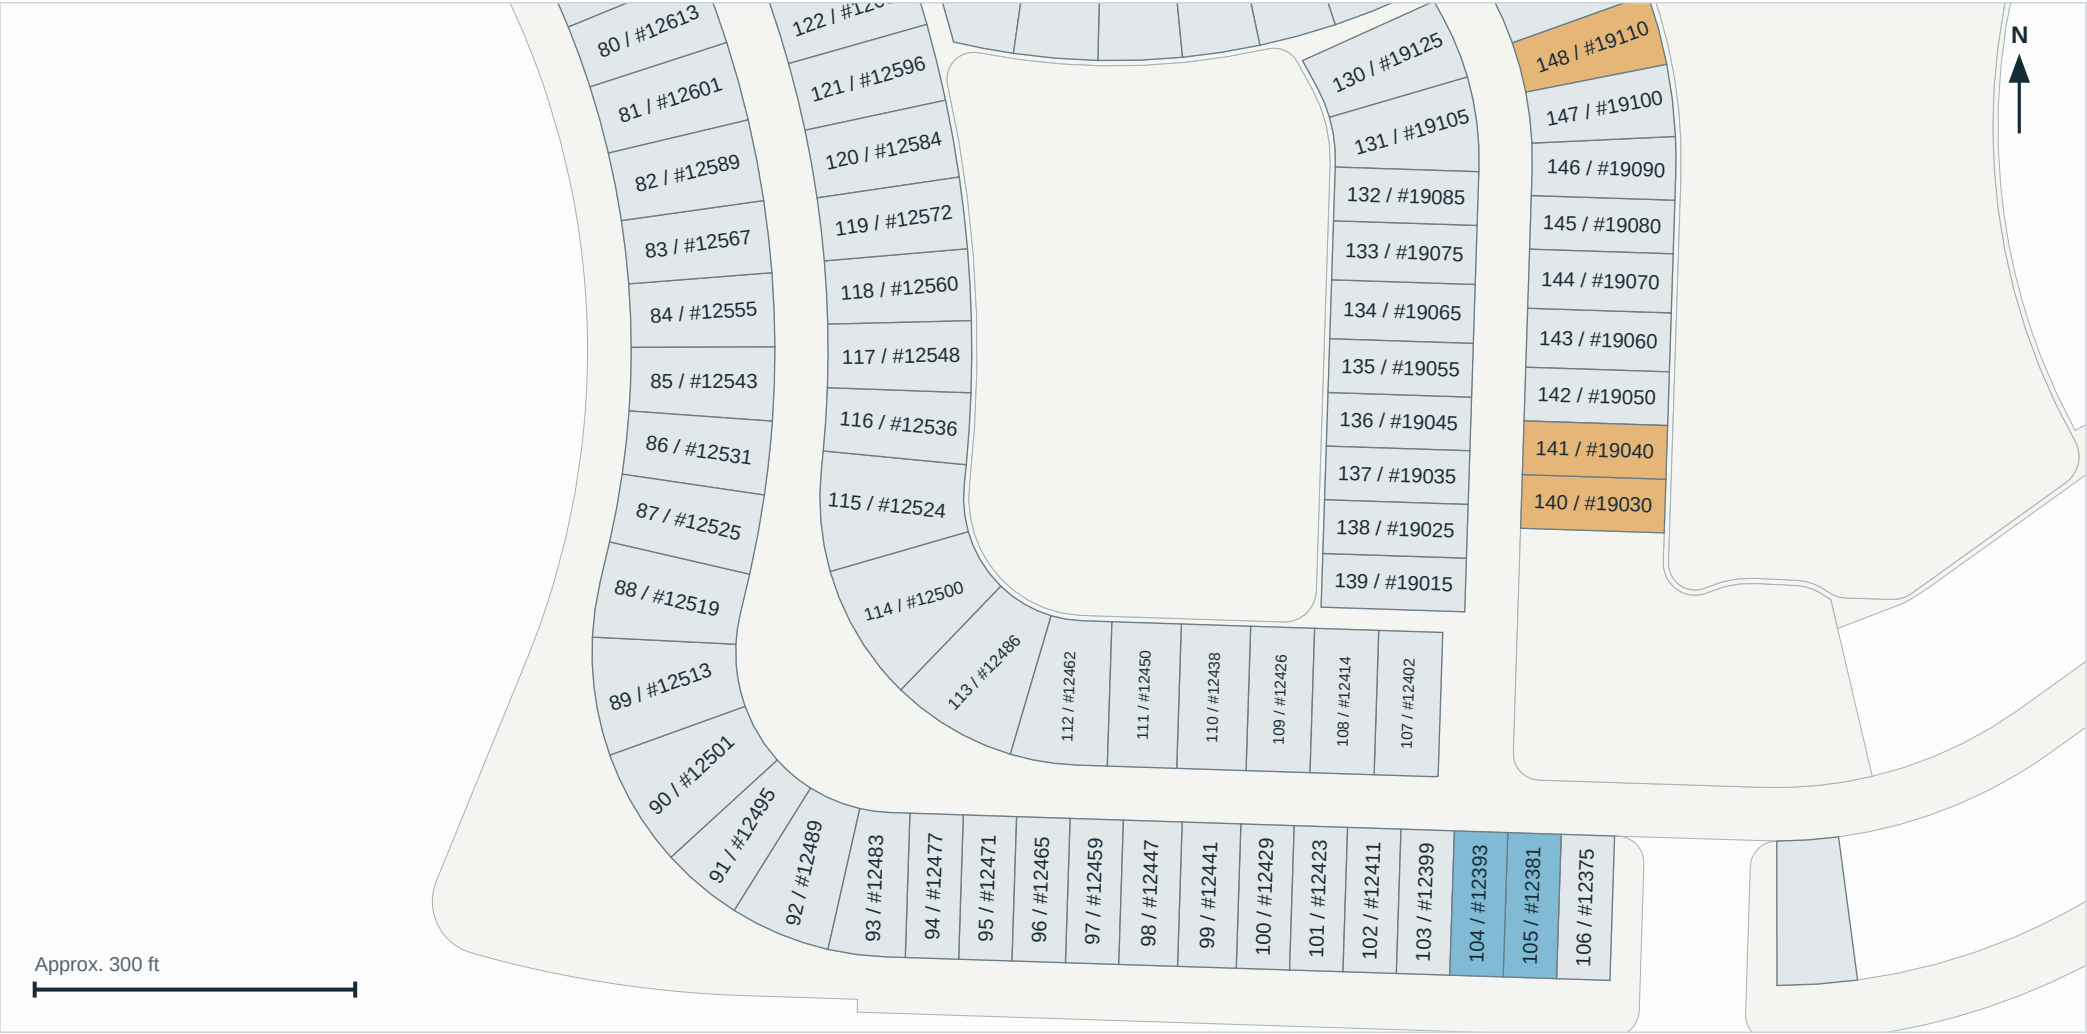

Use the lot index for full street names and timer-zone references. Adjacent detail tiles overlap at the edges.

No range coverage, valve position, timer position, live schedule or isolation instruction is inferred.

Detail tile 3 Southwest

Parcel labels: lot number / #house number | Colors follow the overview legend | North up

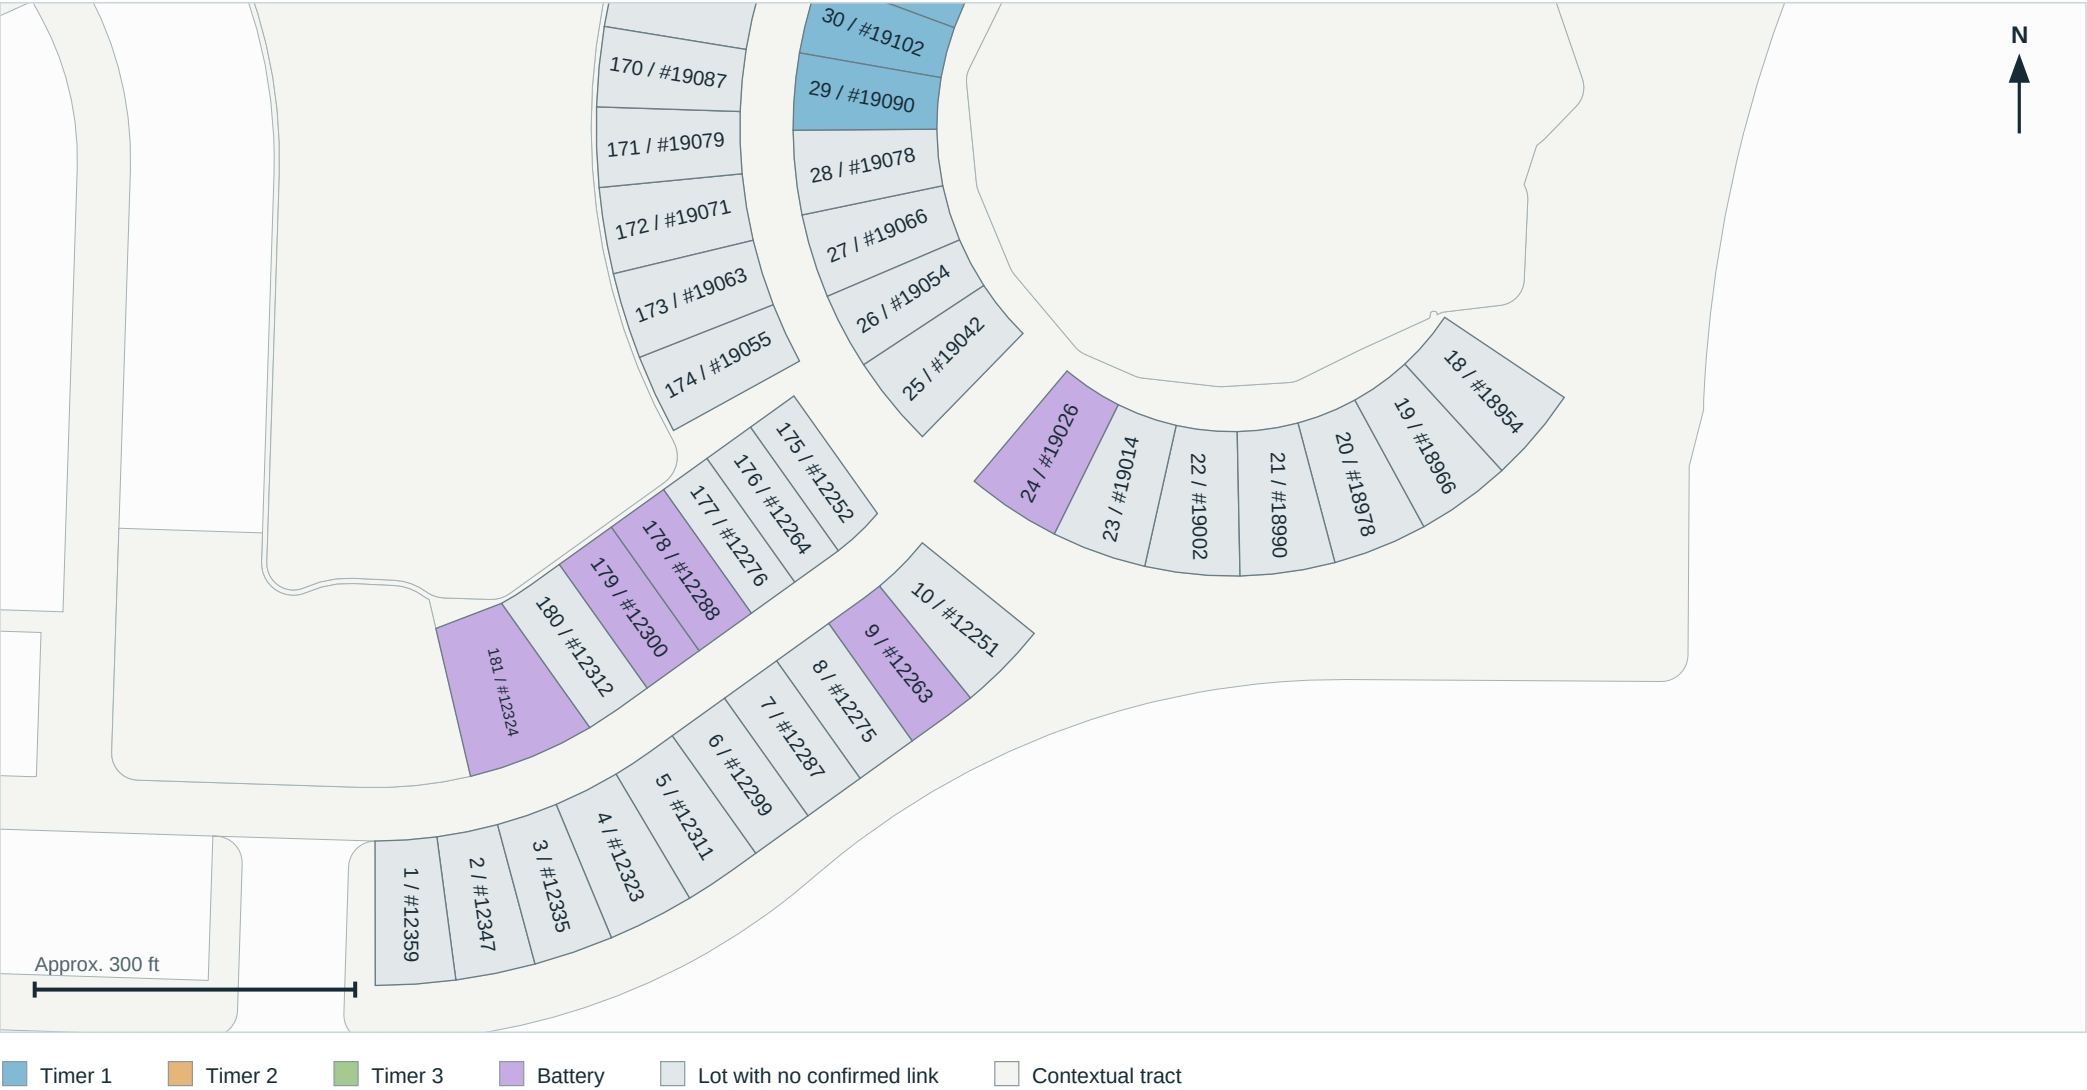

Timer 1 Timer 2 Timer 3 Battery Lot with no confirmed link Contextual tract

Use the lot index for full street names and timer-zone references. Adjacent detail tiles overlap at the edges.

No range coverage, valve position, timer position, live schedule or isolation instruction is inferred.

Detail tile 4 Southeast

Parcel labels: lot number / #house number | Colors follow the overview legend | North up

Use the lot index for full street names and timer-zone references. Adjacent detail tiles overlap at the edges.

No range coverage, valve position, timer position, live schedule or isolation instruction is inferred.

Reading the atlas

Documentary inventory connections and limits

This atlas contains **181 residential lot records** and **4 contextual tract records**. A tract record may represent multiple named tracts. It is not counted as a residential lot.

The complete inventory has **172 source rows: 34 rows linked** to county lot records and **138 unlocated rows**. 19 residential lots have a confirmed inventory link. Row counts are not counts of unique valves or physical controllers.

Reference format. T2 Z40 S means timer 2, source zone 40, source type S. S = Spray; D = Drip; R = Rotor; B = Bubbler. M is an undefined source code; no meaning is assigned. A is not present in this inventory. A source-row link opens the exact workbook row.

Battery records. Battery is a separate category, not a central timer. Numeric stations were not supplied. The source tab records where the entry appeared and does not assign that battery to a central timer. The raw source zone text is preserved in the inventory.

Unlocated reason codes. U1: Common-area or descriptive reference without a verified geographic point. U2: Multiple-address or range notation retained without inferring coverage, endpoints or intermediate lots. U3: No unique exact county address match; original spelling and address retained.

No confirmed inventory link means there is no safe match in the supplied inventory. It does not establish absence of irrigation. A linked address is a documentary association only; parcel colors are not service boundaries.

Map tiles overlap. Their labels show lot number and house number; use the searchable lot index for the full address and linked timer-zone entries. Maps use county parcel polygons with north up and an approximate geographic scale.

Source comparison conflicts

Current native workbook is primary | Alternate XLSX is comparison evidence only

Timer / zone	Current workbook	Alternate XLSX	Reference
T2 / Z110	Hardwood Dr 12335 S	Hardwood St 12335 S	Alternate file
T2 / Z109	Hardwood Dr 12335 D	Hardwood St 12335 D	Alternate file

Conflicting source values remain visible for review. Hardwood Dr in the native T2 inventory conflicts with county Hardwood St, so those entries remain unlocated. No spelling or address is silently corrected.

Sources and limitations

Source snapshot October 9, 2026 | No owner names or contact details

Documentary reference map only. Parcel colors indicate inventory associations, not hydraulic boundaries, coverage, valve locations, physical timer positions or isolation instructions. Live programs and runtimes have not been verified.

Only unique, exact single-address or street-consistent explicit lot references are linked. Multiple-address strings, ranges, common areas and spelling conflicts remain searchable without an invented map point.

181 residential lot records + 4 contextual tract records from Sarasota County. Parcel snapshot: October 9, 2026. No owner names or contact information are included.

Coverage is subdivision SUBD3538, Oakbend at Wellen Park Phases 1 & 2. Later tract replat SUBD3557 is not overlaid, avoiding duplicate tract geometry.

Battery records are separated from central timers. The current native Oak Bend workbook is the primary source; the alternate XLSX differs and is retained only as source-comparison evidence. Hardwood Dr in T2 conflicts with county Hardwood St and is not silently corrected.

Primary inventory. [Open the native Oak Bend workbook](#). All source rows are linked individually in the complete inventory.

County parcel geometry. [Sarasota County ParcelHosted query](#). Selection: SUBD3538, Oakbend at Wellen Park Phases 1 & 2. SUBD3557 later tract replat excluded to avoid duplicated geometry. Geographic coordinates, EPSG:4326.

Original plan. [Oakbend as build source PDF](#). The appendix reproduces the map area of the original scanned sheet, rotated upright for reading. The title block is excluded. It is source evidence only; it has not been georeferenced, interpreted by OCR or used to invent point locations.

Alternate workbook. [Alternate Oak Bend XLSX](#). It is retained only as comparison evidence and does not supersede the native workbook.

Oakbend original source plan excerpt

Source plan only | Original map excerpt rotated upright; title block excluded | No OCR or georeferencing
